Rain, I have nowhere to go.
                 C
                                    G
                                          D'
I lost way to my home, but I don't mind. (and I dont mind)
             D
Fly, in this cold and lonly night,
Everything is over now, don't remember me!

Yes, it`s unbelieveble how we used to love,
             G
                    C
                                    D'
Feeling very slowly in a mood for fun.
              D
                            \mathsf{Em}
And we never look back, we didn't think about it,
                 G
                                C
Cause those were small affairs, what we did was done!
And I` will be with you, somwhere in the night
   C
In love which has no touch,
                   taping
Glory, wait for us!

I can hold you in my arms,
                     E5
                            d4--2-4-5-
I can tell you oh my darlin`
But that`s not real
There, there is something in the dark.
```

Goin` crazy lovin` blind, oh you and I

You, you might not live for so long.

G5 g3--3-5-7-

Doesn`t realy matter baby,
